

FRONTEND DEVELOPER

Niyesh Koirala

tel +977 9849085828 mail niyeshkoirala@gmail.com loc Sindhupalchok, Nepal
git github.com/niyeshkoirala-blip

Motivated and detail-oriented **Diploma in Information Technology** graduate with a solid foundation in frontend development across HTML, CSS, JavaScript and React. I build responsive, accessible, user-friendly interfaces and connect them to real data through REST APIs and databases like MySQL and MongoDB Atlas. I learn fast, enjoy untangling tricky bugs, and care about shipping clean, maintainable code — and I'm looking for an internship where I can contribute to a real product while growing alongside an experienced team.

01 TECHNICAL SKILLS

FRONTEND & FRAMEWORKS

React

TypeScript

JavaScript

HTML5

CSS3

Responsive Design

BACKEND

Node.js

Express

Python

DATABASES

MySQL

MSSQL

Oracle

MongoDB Atlas

API & WEB SERVICES

RESTful APIs

JSON

VERSION CONTROL

Git

GitHub

TOOLS & IDES

VS Code

IntelliJ IDEA

GitHub Issues

02 PERSONAL STRENGTHS

→ Team Collaboration

Works effectively within cross-functional teams and communicates clearly.

→ Debugging

Identifies root causes quickly and resolves issues with confidence.

→ **Adaptability**

Picks up new languages, tools and features fast.

→ **Problem Solving**

Strong analytical thinking to diagnose and troubleshoot technical problems.

→ **Time Management**

Multitasks efficiently and consistently meets deadlines without dropping quality.

→ **Ownership**

Reliable, self-driven and contributes positively to a shared codebase.

03 EDUCATION

Dinesh Ramji Polytechnic Institute

CTEVT · Nepal

Diploma in Information Technology

04 PROJECTS

01 Lumio — AI Study Companion

React

Node

MongoDB

Ollama

Qwen2.5-VL

Full-stack MERN · local vision LLM

A study app where students scan homework problems, take notes and handwrite on a canvas. A locally-hosted vision LLM (Ollama + Qwen2.5-VL) reads photos and handwriting, explains solutions step-by-step, and generates summaries and quizzes — 100% free to run with no API keys or usage costs.

repo github.com/niyeshkoirala-blip/lumio

02 GAMBIT — Chess Platform

React

Node

Stockfish

UCI

Full-stack · engine built from scratch

A full-stack chess platform with online multiplayer, local pass-and-play, and engine modes. The move-validation engine — legal moves, check, checkmate, stalemate, castling, en passant, promotion — is written from scratch with no chess library. Stockfish drives the bot over UCI with adjustable difficulty and per-move analysis grading each move from Brilliant to Blunder.

repo github.com/niyeshkoirala-blip/chess-with-computer

03 Pitch Side News — Football Page Bot

Python

Pillow

RSS

GitHub Actions

Serverless automation · GitHub Actions cron

An end-to-end automation running a football-news Facebook page with zero manual input. It pulls stories from major sports RSS feeds, ranks them with a weighted 300+ signal breaking-news scoring engine, generates a branded 1080×1080 post image with Pillow, and publishes via a Make.com webhook — running every 30 minutes on GitHub Actions with no server and full deduplication.
